Ranked List Tables should not be buried in the .pdf reports

- I like the current Infogram dashboards on the site, e.g.:

  - clean, sleek looks

  - fascinating scatterplot between p.f.* & e.f. → the relationship & outliers

  - likewise, relationships between h.f. and democracy, or regions

- I still think the **main table from the report** is the most interesting part of the study and could be simplified and included in the main page in the form of a dashboard

  - Could be used for data selection →

- Countries are ranked by combined index (h.f. = (p.f. + e.f.)/2)

- However, the ability to **rank by any one of the columns** would be useful & show p.f. & e.f. rank separately also
